

RANSOMWARE

As users of IT systems we get bombarded on a daily basis regarding virus attacks, phishing attacks, ransomware scams and cyber security.

It is all too easy to ignore and think that this will never happen...

...Until it does!

What can I do to protect my data and my business?

At Q Networks we recommend a multi-layered approach to protect your critical business data and business continuity including:

- Up to Date Anti-Virus Protection
- Fully Configured Firewall
- Malware Protection
- SPAM E-Mail Filtering
- Backup Management
- Disaster Recovery Planning
- Critical Data Replication
- Server Replication
